RPG Combat Kata

Welcome!

(Start recording)

橙空道場
橙空手 & オレンジ
KARATE & ORANGES
KARATE & ORANGES: THE COMBAT PROGRAMMING KATA
[MGR]
GM 500M/5000
IAN 5007500
師範
PLAYER1 uses 'PUNCH'
PLAYER1 uses 'PUNCH'
DOJO_BOT takes 15 DMG
PLAYER2 uses 'KICK' on ORANGE
CRITICAL HIT! Orange HP -> 0

Coding Kata Is Coming!

A little background before we start

01.

Why coding-kata?

Tradition of organizing in BU. Besides Raith Munro asked for that and i liked it ;)

02.

What is kata?

Choreographed patterns of movements practiced in martial arts to build muscle memory, technique, and form.

03.

What is coding-kata?

Code challenges focused on improving skill and technique.

I want to organize next kata, what shall i do?

01.

First, Join #cct-coding-kata on Slack and discuss your idea with kata gurus. Check for example this repo or think about own kata concept (what Kacper Kaczmarek is preparing - stay tuned!!!).

02.

After you agree on topic decide the dates

Exclude holidays of any country that we work with or “wartime” in company to allow more people to join.

03.

Schedule a meeting in calendar

Send invitations to:

apps.vcc.eng@vonage.com, cct_interaction_control@vonage.com, apps-calls-sdk@vonage.com, corevoiceengineering@vonage.com, orca@vonage.com, uiam@vonage.com

04.

Post a message on tell-cct

Be creative (at least give gemini some good ideas to work with).

What's the plan?

Use this repo

It contains all informations you need to complete this kata.

Work in sequence

Don't reveal iteration instructions without completing the previous one.

Join Retrospective

Session to talk about what we did. Let's say - max 5 min shows, depending on volunteers number.

- Use programming language of your choice
- Using AI? If you see value in doing kata this way - why not?
- Extending your code after completing tasks.
- Presenting on retro even if you're not 100% happy/proud of what you do.
- Not following the order of tasks. Checking contents of task before finishing previous ones.

That's it!

See you tomorrow at 2:30 PM
